DETAILED ACTION

Claim Objections

- 1. Claims 7-8 and 12-13 are objected to because of the following informalities: It appears as if the third instances of the word "a" should be deleted from line 14 of claim
- 7. Claims 8 and 12-13 are objected to as being dependent upon an objected base claim. Appropriate correction is required.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Borichevsky (4,273,379) in view of Gentry (6,848,746). Borichevsky discloses a chair apparatus (10) comprising a frame having a plurality of frame members (11), the frame members (11) being moveable between a first position for storage (Figure 3) and a second position for use (Figure 1); a backrest (unlabeled) defined by the upper extensions of leg members (13); a seat (unlabeled) defined by cross bars (12b) and (12d) and moveable relative to the frame members (11) given the folding nature of the chair (10), the seat comprising a first resilient seating layer (17), the seat support defining an opening (unlabeled) as the space between cross bars (12b) and (12d) and at least a portion of the first resilient seating layer (17) extending over the opening so

that the first resilient seating layer (17) is capable of extending below the seat support (unlabeled) defined by cross bars (12b) and (12d); the chair further including a second resilient seating layer (27) extending over at least a portion of the first resilient seating layer (17); and, wherein the frame mummers (11) include a first set of legs (14)(14) and a second set of legs (13)(13) pivotally connected to the first set of legs (13)(13) at pivot (15) and moveable between the first position and the second position, wherein the backrest extends between the second set of legs (13)(13) and the seat is support by the first (14)(14) and the second (13)(13) set of legs. The seat provides a predetermined seating area and the backrest provides a predetermined backrest area being larger (as best depicted in Figure 1) than the predetermined seating area.

Borichevsky discloses all claimed elements with the exception of a cover extending over the first resilient seating layer and comprising a first cover at the second set of legs and a second cover at the first set of legs.

Gentry discloses a seat cushion comprised of a second resilient material (25) and a cover (27). It would have been obvious to use the covered cushion disclosed by Gentry in place of the cushion disclosed by Borichevsky. The cover (27) could be removed from the cushion disclosed by Gentry to be washed, furthermore it facilitate the use of heating and cooling packs (23). The cover (27) has a first cover (49) that would lie at the second set of legs and a first cover (4) that would lie at the first set of legs.

Allowable Subject Matter

4. Claims 7-8, 12-13 and 29 are allowed.

Art Unit: 3636

Response to Amendment/Arguments

5. The amendment filed on June 30, 2005 has been considered in its entirety.

Remaining issues are detailed in the sections above. In light of the new grounds of the rejection set forth, this action is made NON-FINAL.
